How are we born? What conditions are needed for life to appear? What types of reproduction are there? Did you know that sea turtles bury their eggs on the same beach where they were born? And that starfish can generate a new organism from one of their fragmented arms?

Sometimes, a birth can be dazzling. At other times, however, it can be delicate and subtle. There are no rules, only infinite diversity managed with admirable ingenuity and patience by nature.

NON FICTION

Why do we die? And what happens to us when we die? What is the most lethal animal for human beings? And the last sense we lose before we die? Did you know that there are dogs that smell death? And that there are species that reproduce only once and then die? Why don't we talk about death?

Death is part of the cycle of life. Death is as natural as birth. When we are born, we are all destined to die. It is one of the sacred laws of nature.

She opened an Instagram account called @elembarazodelosunicornios (literally, "the pregnancy of unicorns") when she became pregnant and discovered that real motherhood was not as rosy as it was made out to be. If you are a mother, it is impossible to read it without a smile on your lips remembering your own stories. If you are not one yet, it is a good way to learn about the reality of being one. In the end, she shows that being a mum is not what they had told you. It is better.

Oscar became a father and was perplexed: it was not like they had told him it would be. He illustrated the first year of living with his son, reflecting (with a lot of humor) on everything he was experiencing — from how complicated it is to button up baby pajamas to the most transcendental sense of fatherhood.

A fun graphic novel where Oscar discovers what becoming a father is actually like. Because, as he says, "this is not like what people told you".

And all of a sudden dad
